

LEE BLUE

SKILLS & ABILITIES

I am accomplished in the following business and technical areas:

- Software architecture and design
- Software programming and technologies
- Gathering and communicating business and technical requirements.
- Learning new programming languages and technologies in order to stay current

I am adept with many software languages and technologies including:

- Windows – (C#, VB, VB.Net, VFP, HTML, CSS, XML, JavaScript, Web Services, Office, Git)
- AS/400 – (RPG, CL)
- Databases – (SQL Server, MySQL, MS Access, DBF)

EXPERIENCE

THOMSON REUTERS –TECHNICAL CONSULTANT

2012-Present

Provide programming support for document generation products that Thomson acquired when they purchased Cowles Legal Systems.

COWLES LEGAL SYSTEMS, INC. – EAU CLAIRE, WI – CHIEF TECHNICAL OFFICER

1993-2012

Designed and developed document generation technology that was sold to attorneys throughout the United States. Besides being involved in all aspects of product development I also designed educational products as well as designed and implemented a help desk system.

LBA – MINNEAPOLIS, CHICAGO – FOUNDER/PRESIDENT/CTO

1986-1993

Managed a software development and support company with an emphasis on technical excellence. The focus of the business was to develop solutions and complete applications in house.

Management Responsibilities:

Customer relations, quality control, hiring personnel, employee reviews, project management, equipment acquisition, accounting.

Technical Responsibilities: Designing custom applications, application development, troubleshooting existing systems, creating internal development standards and internal productivity tools.

Examples:

EPMS Engineering Project Management System - Developed for Telex Communications to provide for the tracking of Engineers time and cost against projects. Senior analyst at Telex and myself designed application jointly. I was involved in all aspects of development, including documentation of the finished product. After its completion it was reworked and marketed through IBM's VAR program by Midland Information Systems.

LumberPac Wholesale, Distribution for Lumber - Developed a complete modular Lumber Distribution software product. It features Order Entry, Order Entry/Directs, Inventory Management, Sales History, Sales Forecasting and Contact Management. It integrated to PC based products such as Lotus 123 and Harvard Business Graphics.

A/R Credit History System for MAPICS - Provided customer payment history for MAPICS Accounts Receivable.

EDUCATION

SPECIALIZED EDUCATION
